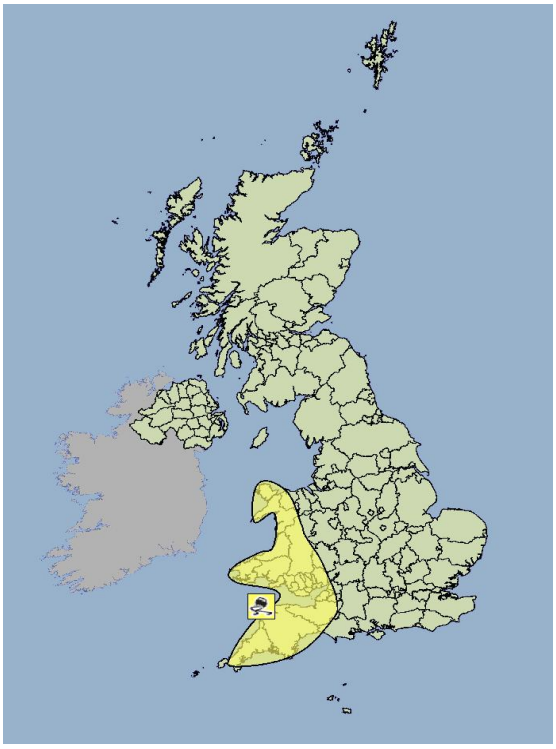
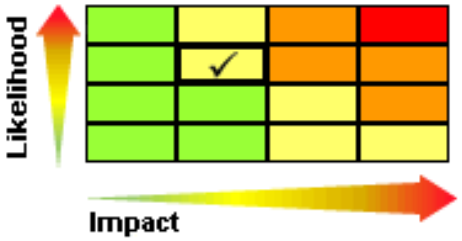
National Severe Weather Warning Service





Chief Forecasters Assessment
Following a spell of rain, sleet and hill snow on Saturday evening, temperatures will fall quickly and icy patches are likely to form on untreated surfaces. Further showers are also possible in some places overnight and into Sunday morning. Where these occur it will lead to temporary wash-off of treatment resulting in an additional ice risk.

This is an update to the warning issued earlier, to extend the area further north and east.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **22:00 on Sat, 04th Feb 2017** until **10:00 on Sun, 05th Feb 2017**

Ice is expected to form in some places overnight and at first on Sunday morning, which may lead to difficult driving conditions on untreated roads and slippery conditions on pavements.
